Date	Notification No.	Issue
11.02.2026	PCN_0021	A

Product ID (Description):

Former / actual Part Number	Former / actual Part Number Description	New / Alternate / Replacement Part Number	New / Alternate / Replacement Part Number Description
VG95234	VG95234 (Cadmium Plated)	AA95234	AA95234
VG95328	VG95328 (Cadmium Plated)	AA95328	AA95328
VG96912	VG96912 (Cadmium Plated)	AA96912	AA96912

Description of Change:

According to the official notification issued by the BAAINBw, the approval certificates for cadmium-plated and Cr-VI-containing connectors of these series will expire on June 30th, 2026. This information applies both to connectors manufactured by Amphenol-Air LB GmbH and to the corresponding products supplied by our affiliated VAD partners.

Effect of Change:

Connectors already installed in existing systems may continue to be supplied in cadmium-plated versions with manufacturer marking (AA part number). VG part numbers may be provided if they were manufactured no later than June 30th, 2026.

Technical characteristics and performances:

The new AA part numbers are a 1:1 replacement for the legacy VG cadmium plated part numbers.

Visual Characteristics:

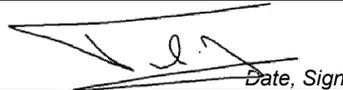

Part numbers printed on the connector and label changes from VG to AA.

Interchangeability:

The new part numbers are based on the respective VG interface definitions and are fully compatible **in terms of form, fit and function**. This enables simple and direct cross-referencing from existing VG part numbers to the new AA manufacturer standards without requiring changes to existing systems or interfaces.

Application date:

June 30th, 2026
